Welcome

Welcome to our 2018 Bay Window catalogue; it's hard to believe that when we produced our first catalogue in 1994 we only had about 400 parts in our range. Today we stock over 7,500 different product lines (*that's over 420,000 parts in stock*) plus our range of camping and accessories too. Along this line of thought do you know that we do:

A 10% Discount card

When you insure your car with Just Kampers

Offer FREE delivery in the UK for orders over £35

No oversizes, no longwinded lists of exceptions, just fast 7 days a week dispatch

0% Finance on orders over £399

Helping fellow VW Enthusiasts spread the cost of restoring or maintaining their VW

Price Match on parts and accessories

Saving you the hassle of searching around for the best deal

And we can even save you money on insuring your VW

We are so sure we can offer you a better deal on your insurance, that if we can't beat your current cost, we'll give you £20 in JK vouchers.

Since we first launched our website in the mid 1990's (back when www stood for world wide wait) we have expanded it to include thousands of pages of useful information, not just parts for sale. Here are a few examples of sections that might be useful to you:

Market place

Where you can buy and sell VW's, parts and accessories for FREE

How to Videos

Lots of really detailed and useful videos, helping you to maintain your VW

Fitting Guides

Lots of really detailed and useful guides to read / print, helping you to maintain your VW

Model History

Lots of detail helping you find out more about your Camper / Transporter

Garage Finder

If the how to videos and tech sheets didn't help, you can use this service FREE to find a local specialist garage

Owners club listings

Find a local, national or international owners club for your interest group / model

Shows and events listing

Meet up with fellow VW fans at local, national or international events and shows

Follow us on Facebook, Twitter and many other social media channels.

Best regards

Mark Reynolds MD

Technical information

Engine numbers

The engine number can be found stamped on the top of the crankcase, centrally above the crankshaft pulley on the type 1 or type 2 engine. And stamped on the top of the crankcase above the Cooling fan on the type 4 engine.

Type 1 and 2 Engines

CODE	CC	BHP	NOTES
B	1600	47	Single Port
AD	1600	50	Twin Port
AS	1600	50	Twin Port

Type 4 Engine

CODE	CC	BHP	NOTES
CA	1700	66	Type 4
CB	1700	66	Type 4
CD	1700	66	Type 4
AP	1800	68	Type 4
CJ	2000	70	Type 4
GD	2000	70	Type 4
GE	2000	70	Type 4

Reconditioned engines

Note: Reconditioned engines are sold on a 'like for like' basis (i.e. A 1600cc Type 2 engine cannot be replaced by a 2000cc Type 4 engine).

Engine types

There were two engine options that were originally fitted to the VW Transporter between 1967 and 1979.

Type 2 engine 1600cc

First was the Type 2 1600cc engine, which is the most popular and identical to the Type 1 Beetle engine except it has an extra engine mounting at the rear of the crankcase.

Type 4 engine 1700, 1800 & 2000cc

The second option first appeared in 1972 and this was the Type 4 engine which was available in three sizes, 1700, 1800 and 2000cc.

A brief model history

August
1967

Saw the 'Bay window' model replace the 'Split screen'. It was a radical rethink with changes such as ball joint front suspension, rather than king and link pin. IRS rear end instead of reduction boxes and swing-arms, a one piece windscreen, wind down cab windows. Engines were fitted with a 'back bar' to stabilise the engine. In fact just about every body panel and mechanical part is changed.

1969

New front axle, fuel tank is now hidden behind a bulk head, door handles are changed.

1970

Minor changes took place such as the fuse box, otherwise an uneventful year.

1971

1971>72 saw the introduction of front disc brakes and new rear brakes. Also the introduction of the small 5 stud wheels with flat hubcaps.

1972

Bodywork changes included flared front and rear wheel arches. Tall rear lights, with reverse lights as an optional extra. This year also saw the introduction of the 1.7L flat Type 4 style engine with twin carbs. There were some vehicles with early style arches and disc brakes. A few of the late '72 vehicles have high front indicators and '73 on front panels but still have the wrap around style front and rear bumpers.

1973

Sees a huge model revamp. The 'wrap around' style bumpers were replaced with the square style. The front indicators were moved up to the new grille. Changes were also made to the front arches and cab floor, accelerator linkage, steering box and so many other improvements such as the 1800cc engine. Front brakes were again upgraded.

1974

Main changes were improved gear linkage, the indicators and wash wipe switches were upgraded, along with the sliding door and lock.

1975

Only big change was the cab doors are a 'one year only' style.

1976

Changes to the cab doors / hinges. The accelerator linkage and pedal are also revamped.

1977

Saw no notable changes.

1978

The main change was in August 1978 when the 2000cc engines had new cylinder heads and the heat exchangers were remodelled.

1979

Sadly saw the end of 'Bay Window' production in Germany.

Identifying early & late models

Early 1967>72

Small rear lights, smooth wrap around bumpers and low mounted front indicators above bumper.

Note: late 71 'bays' onwards have the flared wheel arches, late 72 'bays' onwards have the large rear lights.

Late 1973>79

Large rear lights, grooved non wrap around bumpers and high mounted front indicators either side of the grill. they also have the flared wheel arches all round.

Handy Hint! What is Nearside & Offside?

Many parts are described as being Nearside or Offside, this simply indicates which side of the vehicle the part fits. For the UK an easy way to remember is nearside means near the kerb.

Nearside & Offside remains the same, regardless of whether the car is left or right hand drive.

Nearside Offside

Handy Hint!

Chassis Numbers

This number can be found stamped on an aluminium plate either behind the front seats or in the engine bay.

229 375 250

- 16 Cast Counterweight Crank (69mm) 1600cc 1967 to 1979**
Cast Counterweight Crank 69mm stroke 8 Doweled Heat Treated
J17954 ... **£289.75**
- 17 Big End Bearing Set 1600cc 1967 to 1979**
This standard size, big end bearing set fits all 1600cc
J10438 113105701... **£14.25**
- 17 Big End Bearing Set 2000cc 1974 to 1979**
Standard size big end bearings to fit 2000cc engines.
J18071 021198481A... **£69.25**
- 18 Main Bearing 1200cc - 1600cc 1961 on**
This set of standard size bearings fits 1200cc - 1600cc
J11100 070198461... **£38.75**
- 19 Dowel Pin (for Main Bearings) 1600cc 1967 to 1979**
This dowel pin locates the main bearing into the crank case
J10457 111101123... **£1.70**
- Big end (con rod) Bearing Set (Standard) 2000cc 1975 to 1979**
A complete set of standard size main bearings
J19354 039105701... **£40.00**
- 20 Small End Bush 1600cc 1967 to 1979**
Sold singly four required per engine.
J11034 311105431A... **£6.50**
- Crankshaft Pulley Bolt 1600cc 1967 to 1979**
OEM crankshaft pulley bolt fits all 1600cc engines.
J16691 111105263A... **£6.25**
- Washer for Crank Pulley Bolt 1600cc 1967 to 1979**
A OEM washer for crank pulley bolt.
J16766 111105259... **£4.25**
- Crank Pulley (Standard) 1600cc 1967 to 1979**
This standard crank pulley fits all 1600cc engines
J10549 113105251G... **£21.75**
- Aluminium Crank Pulley 1600cc 1967 to 1979**
Features a black-printed scale to aid accurate engine timing.
J10580 ... **£32.25**
- Serpentine Pulley Kit (Black) 1600cc 1967 to 1979**
These kits are designed for high R.P.M engines.
J14340 ... **£263.75**
- 21 Camshaft 1600cc 1967 to 1979**
This is the three-bolt style camwheel with timing gear.
J10440 113109021D... **£84.75**
- 22 Cam Bearing Set 1600cc 1967 to 1979**
Standard-size set of cam bearings all 1600cc
J11101 111198541... **£11.75**
- 22 Camshaft Bearing Set All Engines 1971 to 1979**
Standard-sized camshaft bearings are sold as a set.
J10594 021198541... **£19.75**
- 4 Cam Follower 1600cc 1969 to 1979**
Sold as singles 8 required per engine.
J15269 113109309C... **£7.75**
- 4 T2 Cam Follower 1700, 1800, 2000cc**
Non-hydraulic cam follower for Type 4 engines sold as singles.
J11426 021109309G... **£11.75**
- 23 Timing Scale 1700, 1800, 2000cc 1972 to 1979**
Provides the timing reference point for your engine.
J13415 021119249E... **£11.25**
- Valve Adjustment Sticker (0.15mm / .006)**
Authentic period Volkswagen sticker.
J15078 ... **£3.00**

Simply bolts on the bottom of your engine

J14336..... **£116.75**

Handy Hint! Clutch cable conduit

When you replace a clutch cable, check the condition of the clutch conduit. It often breaks inside, leaving a sharp metal which will eventually cut your new cable.

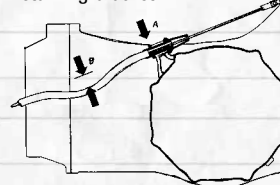

Handy Hint!

Adjusting the clutch pedal free-play

Clutch adjustment is carried out by means of the adjusting nut on the cable end. Release the locknut, and turn the adjusting nut to give a pedal free-play of 10-25mm (0.4-1.0 in) which corresponds to the correct clearance of approx. 2 mm (0.08 in) on the clutch release bearing. Tighten the lock nut.

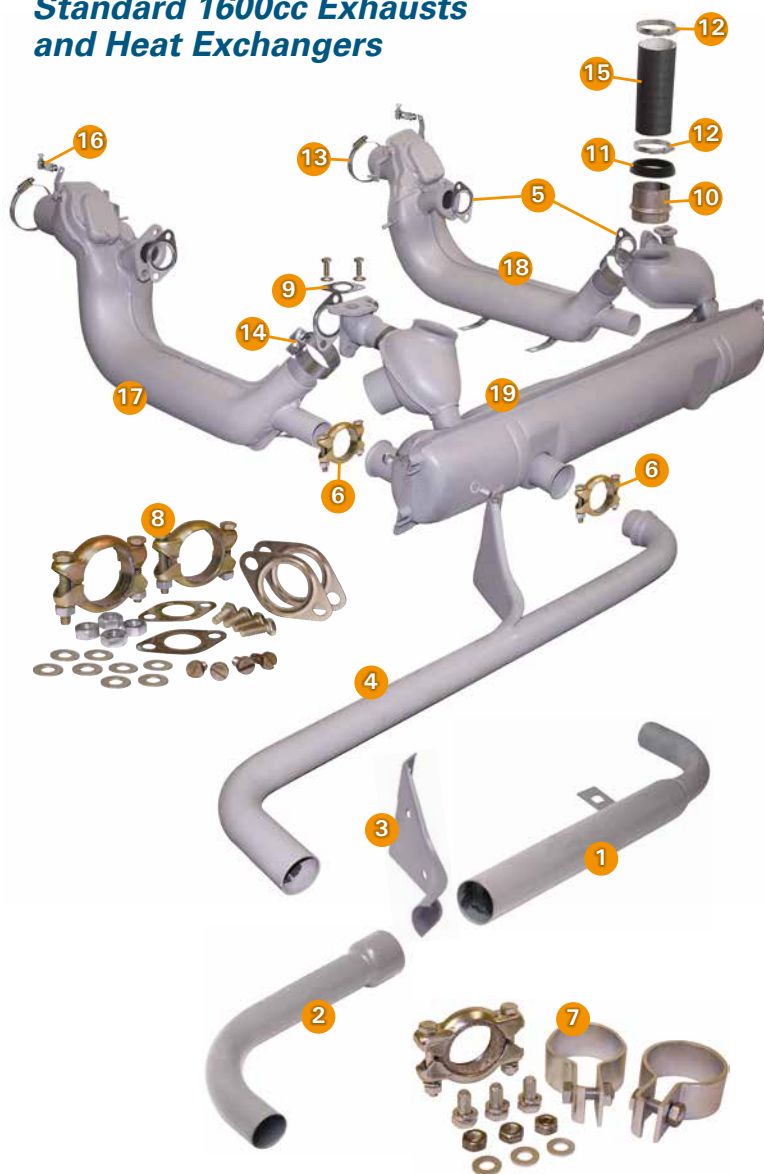

To avoid cable snatch, the clutch cable guide should sag 25-45mm (1.0-1.8 in) as seen in the diagram

below. The sag at point 'B' is achieved by inserting or removing shims at point 'A', between the end of the cable guide, and the retaining bracket.

Standard 1600cc Exhausts and Heat Exchangers

All of Just Kampers exhaust fitting kits and exhaust gaskets are supplied by companies such as HJS and are of the highest quality available.

HJS is a company based in Menden in central Germany with 39 years experience producing exhaust systems and fittings to the highest quality.

Heat Exchanger Bundle Deals

SAVE 10%

Once the winter gets going, most owners would surely agree that one of the best improvements you can make to your treasured T2 Bay is to revive your heating system! Our heater refurbishment kit fits all 1600cc VW T2 Bay Window vans and provides everything you'll need. At the heart of the kit are 2 good quality, reproduction heat exchangers - the next best available in the absence of original parts. These may have fewer internal fins than the originals, but our testing shows that they provide more than adequate heating and will be a major improvement over any aged system.

Heater Refurbishment Kit RHD 1967 to 1971

Kit comprises:

2x heater tubes from exchanger to Y-tube

2x heat exchangers (left and right)

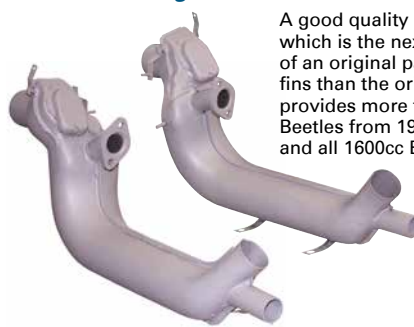

1x silencer fitting kit

J15072

Bundle Kit Price £209.00

Heat Exchangers 1600cc 1967 to 1979

A good quality reproduction heat exchanger which is the next best available in the absence of an original part. Although it has fewer internal fins than the original, our testing showed that it provides more than adequate heating. Fits VW Beetles from 1963 onwards; T2 Splits 1963-1967; and all 1600cc Bays 1967-1979.

17 Nearside/Left

J10080 043255107N **£79.25**

18 Offside/Right

J10638 043255108DH **£79.25**

Exhaust Silencer 1600cc 1963 to 1971

This Exhaust Silencer fits 1500cc Split screens from 1963 to 1967 and Bay windows up to 1971. These products are made to original specifications making them easy to fit. We recommend checking the condition of the rest of your exhaust while fitting this product.

19 J16994 **£91.50**

Exhaust Silencer for 1600cc 1973 to 1979

Fits all 1600cc VW T2s from 1973 to 1979. It can also be fitted to earlier T2s - as long as the tailpipe is changed for part J10427 at the same time. In any case, we recommend renewing the tailpipe and gaskets when you change your exhaust.

19 J10083 211251051T **£79.75**

Exhaust Kit 1600cc 1967 to 1979

This kit Contains the Silencer, A one piece tail pipe and the gaskets and clamps to fit. These kits will fit all 1500cc VW T2 Splits from 1963 to 1967 And 1600cc VW T2 Bays 1967 to 1979

11 J11219 211298051 **£138.75**

Bundle Deal

SAVE 10%

Heat Exchanger and Exhaust Kit 1600cc 1967 to 1979

Replace your rusty old exhaust with a system that also improves the heating inside your 1600cc T2!

This kit does it with a pair of heat exchangers, silencer, tailpipe, gaskets and fittings. An economical solution which also gives you the benefits of an upgraded heating system, this kit can also be fitted on earlier vans which have 1500cc or 1600cc engines.

Kit comprises: Silencer, Tailpipe, Pair of heat exchangers, Gaskets and fittings

Handy Hint!

The heating on my air cooled VW is rubbish!

The heating system relies on the air arriving at the front warm and in a decent enough volume.

The main problem is that the pipework from front to rear is made from many pieces and over the years the various parts move/ rust away and each joint leaks a bit of warm air. When the piping was new it was insulated to keep the warmth in, often this insulation is now missing and the pipes require re-insulating.

The air for the heater is also the air that cools the engine, so every joint and pipe needs checking from fanhousing to dashboard.

The other main problem is that pattern heat exchangers do not have as many fins inside, the fins are the aluminium area inside the heat exchanger that the air is blown over and that transfers the heat from the exhaust pipe to the air.

Genuine heat exchangers are becoming harder to find, so snap them up when you see them. You should also make sure the heater cables are functioning correctly, otherwise the flaps on the heat exchangers will not open and no heat will come down the pipes you have just repaired.

Heater Cable (Left Hand Drive) 1700, 1800, 2000cc

Fits offside Left Hand Drive Type 4 engines vans.

J13504 211711630N ...GEMO... £15.25

Propex Heating Bundle Deal

SAVE 10%

NEW Improved bundle kit!

Propex Heatsource Bundle Kit

Now you can enjoy the luxury of central heating in your Van or Bus, whether you're parked up or on the move – and it's independent of your engine. The Propex HeatSource HS2000 is a highly efficient, compact, interior heating system that is specifically engineered for campers and motor homes, with the luxury of thermostatic control via an easily fitted, wall mounted thermostat. Unlike some heaters, it requires minimal electricity during ignition – so cycling the HeatSource on does not lead to additional battery drain.

Ball race bearings in the heater fans allow quiet operation while a stainless steel burner and heat-exchanger coupled with clean combustion give maintenance-free durability.

Surprisingly compact, in Vans and Buses the unit is usually mounted in a bed-box or cupboard and flued downwards through the floor and out to the side of the vehicle using the flexible stainless ducting provided. It is supplied with a complete fitting kit to suit vehicle installation.

When shopping for an auxiliary heater don't just compare prices...compare what comes with the kit

This JK Propex Bundle Kit save's you money by containing the main components needed to fit the Propex unit into your vehicle. The kit contains: Propex HeatSource HS2000 heater, Gas Regulator, Gas Level Indicator, Gas Bottle Holder, Gas Bottle Hose, Brass Adaptor and 2 metres of copper pipe.

- Heater dimensions (excluding outlets) 31.5 x 16.5 x 9.5cm
- Fuel: Butane, Propane Gas or LPG
- Average gas consumption under continuous operation: (142 grams/hour)
13kg propane will last (91.5 hours)
15kg butane will last (105.6 hours)
- Heat input (2.1kW), heat output (1.9kW)
- Electric current consumption (1.4amps continuous running)
- Air throughput (60 C.F.M)

SAVE 10%

Bundle Kit Price £495.00

J19842 ...UK...

Note: installation & servicing of this unit, must comply with current gas safety register-(GB), Corgi (Ni) regulations or the relevant national organisation.

Please be aware these heaters are rated for use with 30mb butane and 30/37mb propane. This is widely acceptable across Europe though some European countries also use 50mb gas pressure.

Gear Shifter Upgrade Refurbishment Kit 1967-79

Sort out that dodgy gear change and add a distinctive style at the same time with our quality gear shifter upgrade refurbishment kit. It's specifically for VW T2 Bay 1967-1979 and comprises a SCAT quality Bus Shifter, rear gearbox coupling and a 6-piece gear rod fitting kit.

J14720

Bundle Kit Price £159.00

Includes:

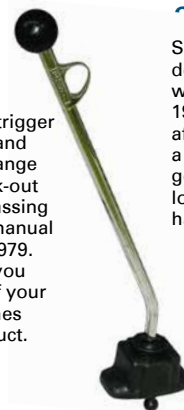

SAVE 10%

Empi Trigger Shifter

Move up a gear in the retro style stakes! This distinctive Empi trigger shifter gives a closer and more positive gearchange and has a reverse lock-out to help avoid embarrassing miss-shifts. It fits all manual VW T2 bays 1967 to 1979. We recommend that you check the condition of your gear linkage and bushes while fitting this product.

J12165
£79.75

Scat Bus Shifter

Scat Bus Shifters are designed to fit all Bay window vans between 1967 and 1979. These after market shifters give a closer and more precise gear change as well as looking very cool. Right hand drive handle

I341
£2.75

CSP Bus Shifter

Due to high demand CSP now produces these Bus shifters. These new generation of shifters are designed to be attractive, a pleasure to use, smooth and precise in operation. Precision manufactured using CNC engineering to offer the maximum in terms of quality and finish. The selector gate is manufactured from steel using ultra-modern laser technology and covered with an attractive black leather boot. The main shaft is manufactured from polished stainless steel while the T-handle is crafted from polished and hardened aluminium. The handle is shaped to fit your hand for maximum comfort, and is also adjustable so that you can swivel it to suit your favoured position.

The reverse gear lock-out is actuated by means of a push button on the side of the handle. While the CSP Bus Shifter naturally shortens the gearshift movement. It is also designed to sit higher than the standard unit and is inclined nearer to the driver. Available in right and left hand drive options

CSP Right Hand Drive Shifter

J31659
£337.75

CSP Left Hand Drive Shifter

J31658
£332.00

Gear Rod Fitting Kit 1967 to 1979

If your gear stick is loose it's better off to replace all those worn out plastic pieces and get your gears back like it used to be. This is the complete kit. Fits all Bus's.

J14355 211798211
£20.00

Aftermarket Gear Lever & Linkage Parts

Quick Shifter Plate

Quick shift plate fits all Bay windows. Reduces gear stick travel up to 40% making gear changes a lot easier. This item will not cure worn out gear linkage problems.

J11070
£5.75

This ball-shaped shift knob is designed to be used with Custom & Speed Parts gear shifters. It features the CSP logo.

J31714
£18.00

Gear Stick Extension

Improve the driving comfort of your VW T2 Bay or early T25 with our JK Exclusive gearstick extension which brings the gearknob approx 12cm (4.5in.) closer to hand. 12mm thread.

J13457
£16.00

Exclusive

Handy Hint! Type 2 gear linkage

The rear gearbox coupling can be replaced from under the vehicle without removing the gearbox or front to rear shift rod. When reinstalling your gearstick the lever should be exactly vertical when placed in 2nd gear with the cranked upper section inclined at about 300 to the rear.

Sideways movement at the gear knob with the gear engaged should not exceed 35mm. In neutral sideways movement should not exceed 70mm.

Adjustments can be made to the stick position by slackening the two bolts on the shift plate at the base of the gear stick.

Handy Hint!

Its like stirring custard!

If the above statement is how you would describe changing gears on your 1967-79 camper you are not alone.

One of the most common questions we get asked is I find it very hard to change gear on my camper, what can I do?

The 2 most common faults are:
1. A very sloppy gearstick

The rear gearbox coupling wears out. This is located ahead of the gearbox and is a form of universal joint. The rubber blocks wear, causing them to slop around in the cage that they are located in. Hence lots of movement at the gear stick end and not a lot happening at the gearbox. Replacing the coupling is a half hour job and easiest with two people.

2. Going from 3rd to 2nd, you end up in reverse and 1st to 2nd can be a real adventure!

The shift plate under the gear stick becomes worn. There is a raised section to lock out reverse until you push the gear stick down.

Another surprise is that so few people remember to change the gearbox oil. We recommend you drain and replace the gearbox oil every 24 months or 24,000 miles (whichever comes sooner).

Regular oil changes of the gearbox oil will extend its life and save you the hassle and expense of replacing the gearbox in the future.

Brake Caliper Conversion Kit 1971-72

Good news for T2 owners – just as brake calipers for the 1971-72 vehicles ran out, we used our know-how to develop a conversion kit that solves your problem. As well as new brake pads, this comprehensive kit includes all necessary fittings to enable the use of later-style calipers on your early Bus, while continuing to use the early-style discs (J10140). Another problem solved – thanks to our expertise and experience here at JK.

CSP Front Disc Brake Kit 1968-70 For 14in/15in Steel Wheels

The CSP disc brake kit is the best selling kit on the market, with many thousands in use since it was introduced in 1996. Its basically a hub/disc combination designed specifically for aircooled VWs. The CNC machined cast alloy hubs accept discs made in Germany with a diameter of 282x9 mm through high-strength connecting elements.

The modified calipers are also from a German mass production manufacturer. Based on the unmodified axle components of the respective cars the CSP disc brakes are mounted to the original spindles by CNC machined adapters. There is no need to modify or alter the spindles, which makes it easy to swap back to the original drum brakes if requested. This kit is of such high quality that it passed the strict German safety tests for TÜV certification.

The CSP disc brake kit is complete with everything needed to bolt it straight onto your VW. But it is essential that the brake master cylinder is dual circuit. We recommend using the CSP dual circuit conversion kit J32010

Wheel Arch Bundle Deals

**SAVE
10%**

Restore your old T2 with this 4-piece, money-saving bundle kit comprising sturdy front & rear arches for nearside and offside.

Wheel Arch Bundle Kit 1967-71

This kit is intended for 1967-71 T2s. These early, 'low-light' models have non-flared front arches while at the rear, the flare on the arch runs along the top edge only.

If you have a later, 1971-72 crossover, JK now produce the correct front arches, available as J18556 and J18557.

J14665 **Bundle Kit
Price £257.25**

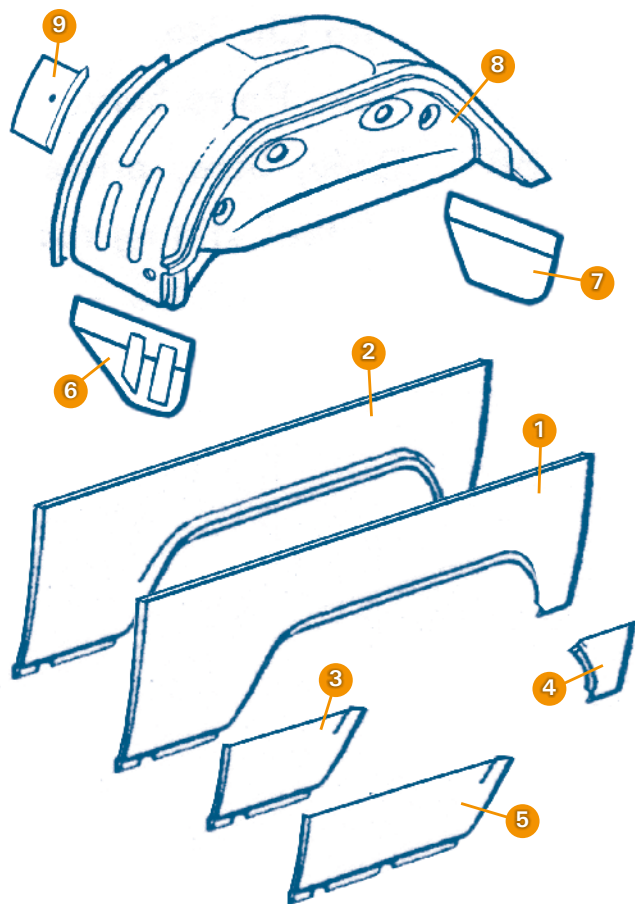

Wheel Arch Bundle Kit 1972-79

This kit is intended for 1972-1979 T2s. These arches fit later, 'high-front indicator' vans which have flared lips on the front and inner steps.

If you have an earlier, 1971-1972 crossover, JK now produce the correct front arches, available as J18556 and J18557.

J14666 **Bundle Kit
Price £508.50**

JK Exclusive UK Made Repair Panels

Just Kampers originally started as a workshop so we understand the frustrations of poor quality parts, or worse still, being unable to source the parts at all.

As the supply of many parts dried up we realised the only way to guarantee a good supply was to invest in remanufacturing these obsolete or difficult to find parts ourselves.

We are continually expanding our range and reinvesting in more tooling and wherever possible, bringing manufacturing back to the UK. As a result, many of the panels shown in this catalogue are produced here at JK in Hampshire.

Handy Hint! Stop the rust coming back

Once you have finished welding the following simple steps can help keep the rust out.

1) If you have replaced a panel like the rear side panel you have a long welded edge, but are unable to get to the inside to seam seal it.

So using finely chopped fibre glass fill along the outside edge squeezing as much as possible into the joint. This will help to stop moisture getting in from the back and rusting the panel out. Sand back the fibre glass filler on the outside and fill as normal.

2) Where ever possible use seam sealer to make sure the damp can not get back in. Seam sealer is available in tubes (that you use in a grouting gun) from most car paint shops etc. It is also available in tins, so that you can brush it on.

3) Panels come in a protective primer. It is advisable to remove this primer before you fill and paint. On the inside it needs to be either sprayed with a waxoyl (or similar) covering which will stop rust starting and dispels water, or it should be painted in a water light paint or under sealed.

4) Avoid cheap under seal. It goes hard with time, cracks and allows water to be trapped between the under seal and the metal. Use flexible products such as Waxoyl under seal or Hammerite paints.

5) Make sure you clean mud from under the vehicle regularly. A pressure washer at your

local petrol station, is great for this. Touch up any stone chips and scratches as soon as possible. Make sure rubber seals are still supple and do not leak.

Handy Hint! Rustproofing your VW

WAXOYL.....rust proofing system

Kills old rust and prevents new rust. A thick waxy fluid, saturated with a powerful rust killer that stays active indefinitely. WAXOYL can be used on the chassis, inside door panels, under wheel arches, in the engine compartment and underneath the vehicle. JK no. J11333

Hammerite underseal

This is designed not to go hard and crack. It is the ideal finish for the underside of your vehicle after you have finished any welding. JK no. J11332

Seam Sealer

This comes in tubes that you can use with a grouting gun. you should seam seal all welding joints that are exposed to moisture.

Brand NEW Cab Doors

These JK Exclusive cab doors are made to the original VW spec. No need to mess around with secondhand or rusty doors – these doors can be bolted straight onto pre-1976 vans using the new hinges supplied. If your T2 is post-1976, you'll need to modify your existing hinges.

The door may also be used on 1967 models, but you will need to either fit a later door handle or modify the door skin to take the early-style, push-button handle.

Noise reduction kits for your Bay Window Camper or Panel Van

Just Kampers have teamed-up with Dynamat, the leading automotive noise and heat reduction specialists, to provide a range of products for your VW.

To make things easier and take the guess work out how much Dynamat you need, we've measured the inside of a Bay Window Camper and put together a range of kits that have all the sound deadening you'll require.

The benefits of installing Dynamat from Just kampers are:

- Less road noise
- Less engine/transmission noise
- Less resonance & rattles
- Improved sound quality from your music system
- Less heat from engine/exhaust

Camper With Windows

Complete Coverage

For maximum results apply our Full Coverage kit. With enough Dynamat to cover all accessible areas of your Camper this really is the best way to make you Bus feel more like a modern car.

Kit includes;

- Door and side panels
- Floors
- Roof

J42353 - £599

All bar the roof

If you've already fitted your headliner or you don't want to remove your existing headliner, this is the kit for you. There's enough Dynamat to cover the entire floor and all doors and side panels.

Kit includes;

- Door and side panels
- Floors

J42354 - £449

Doors & Side Panels

We recommend this kit as the bare minimum. You'll get a 60% improvement by applying Dynamat to the doors and side panels. And you'll get the added bonus of your doors shutting with a modern car thud.

Kit includes;

- Door and side panels

J42361 - £149.50

Jacking Point and Outrigger Bundle Kit 1967-79

Strengthen any weakness now – before your jack finds them, with our jacking point and outrigger bundle kit. Comprises two front outriggers and jacking points two rear outriggers; and two rear jacking points (JK exclusives, made to original specification in the UK).

Unlike some reproduction parts, these are all made to the original specification and from the correct gauge mild steel, so you can be confident they are well up to the job.

Bought as a bundle they provide substantial savings and will fit all T2s, 1967–1979.

Note: Some pre 1976 vans will have an extra set of rear outriggers which are not included in this kit. Part numbers for these are J10041 and J10623.

**Bundle Kit
Price £153.00**

Handy Hint! Ordering window seals

It's a common misconception, that VW Built campers. VW never actually produced a camper. All VW vans were built with either factory fitted glass such as the Microbus or Kombi models, or built as Panel Vans with no side glass. These were then converted into campers by private companies like Danbury, Devon, Dormobile and Westfalia.

Most were built from Microbuses and Kombis, but some companies used panel vans which were converted by adding side windows.

If you are ordering new side window seals, it's important to know whether your van started life with factory fitted glass or whether the glass was added later on.

3 ways to tell if your van has factory fitted glass

Microbus-Kombi with factory fitted glass

Recessed FLAT glass.
Second digit of the Chassis No. starts with a 2, 3 or 4
Van comes with rear seat belt mounts.

Panel van with window conversion

Flush mounted CURVED glass.
Second digit of the Chassis No. starts with a 1
Van has no rear seat belt mounts.

Joining Sleeve (For plastic Trim On Window Seals)

Joining sleeve for deluxe window seals.

ACCESSORIES, GIFTS & TOOLS

BIKE RACKS

Fiamma Supplementary Bike Rail Quick Release Red

Need to carry another bike on your Fiamma Carry-Bike rack? The Fiamma Bike Rail Quick Release Red is a high quality, supplementary 128cm rail with a reinforced base. It's easily installed on your rack thanks to pre-drilled holes on the rail support base and comes with 2 Quick Release sliding straps to secure your bike yet give quick access.

J12255 986-56-097..... **£26.75**

Fiamma Supplementary Bike Rail Strip Red (128cm)

Need to carry another bike on your Fiamma Carry-Bike rack? This sturdy, supplementary, 128cm Bike Rail Strip Red with reinforced base comes with 2 standard sliding straps for securing your bike. Easily installed on the Carry-Bike, it comes with pre-drilled holes on the rail support base.

J12256 986-56-095..... **£21.50**

Fiamma Bike-Block Pro 2 (Red)

The Fiamma Bike Rack is supplied with the necessary bike blocks but if you need a replacement or an extra arm, the Fiamma Bike-Block Pro 2 features 360deg rotating ends and is adjustable from 23cm to 26cm. It comes with non-scratch clasps suitable for round and oval bike tubes of between 25mm and 100mm. Suitable for use with all Fiamma Carry-Bike models.

J12252 04133A01..... **£14.25**

Fiamma Bike-Block Pro 4 (Red)

The Fiamma Bike Rack is supplied with the necessary bike blocks but if you need a replacement or an extra arm, the Fiamma Bike-Block Pro 4 features 360deg rotating ends and is adjustable from 53.5cm to 56.5cm. It comes with non-scratch clasps suitable for round and oval bike tubes and can be used with all Fiamma Carry-Bike models.

Please Note: The ends on the Bike blocks rotate to allow fitting to your bikes frame. Before first use these can be very tight and need to be firmly rotated to allow them to move freely

J12254 04133C01..... **£17.50**

Fiamma Bike-Block Pro 3 (Red)

The Fiamma Bike Rack is supplied with the necessary bike blocks but if you need a replacement or an extra arm, the Fiamma Bike-Block Pro 3 features 360deg rotating ends and is adjustable from 38cm to 41cm. It comes with non-scratch clasps suitable for round and oval bike tubes and can be used with all Fiamma Carry-Bike models.

Please Note: The ends on the Bike blocks rotate to allow fitting to your bikes frame. Before first use these can be very tight and need to be firmly rotated to allow them to move freely

J12253 014-33B-01..... **£15.50**

Fiamma Bike-Block Pro 1 (Red) (04133-01)

The Quick front clamp with its large non-scratch base fits round and oval bike tubes with diameters from 25mm to 100mm. Suitable for all Carry-Bike models.

Please Note: The ends on the Bike blocks rotate to allow fitting to your bikes frame. Before first use these can be very tight and need to be firmly rotated to allow them to move freely

J15719 04133-01..... **£11.75**

Fiamma Bike Rack - Rail End Cap (Red)

Replacement end cap for Fiamma bike rack rail end.

J13568 986-56-079..... **£3.90**

Fiamma Strip 2 X Secure Strap

Used to secure the bike wheels to the rail of the Fiamma Carry-Bike system, these Fiamma Security Strips come as a pair. With stainless steel buckles and measuring 139mm x 13mm, they fit all Fiamma bike racks and most other bike carrier brands.

Fiamma is characterised by innovation, quality and reliability and excellent after-sales service. As the inventors of the case awning for motorhomes, they are very much aware of the requirements of campervan and motorhome owners and tailor their products accordingly.

J16118 986-56-320..... **£7.50**

ELECTRICAL

Reversing Lamp Fitting Kit VW T2 Bay 1967-1971

Reversing lights were only offered as an option on the Early VW T2 Bay. Easily fitted, our DIY set provides the switch, fuse holder, wire and connectors ready to take a reversing light J11631 or J17087 which we supply as a separate part.

J11647 **£11.25**

Reversing Lights Fitting Kit T2 Bay 1972-1979

Fits VW T2 Bays from 1972 to 1979.

Kit comprises: Reversing light switch; 2 bulbs; 2 bulb holders plus wire and connectors.

Easily fitted, our DIY upgrade set comes in a money-saving bundle and provides everything you need.

J10511 **£22.50**

Tachometer 6000 RPM 52mm

A classically styled tach featuring a chrome bezel with black face with back lighting. Suitable for use on any 12 volt system this 6000 RPM rev counter is set for 4 cylinder engines but can also be switched for 6 and 8 cylinders.

J41627 **£90.50**

Chrome Gauge Holders (Motormeter Style)

A classic reproduction of the Motormeter gauge holder as offered in the 50s and 60s. This simply clamps onto your steering column meaning that it will fit just about any vehicle with a clear column so no need to cut your pristine dash board to fit an accessory gauge. Finished in Chrome this holder will take any standard 52mm gauge. Please note for some models like splits/bays then smaller diameter steering columns means you may need to pad out the clamp or shorten the steel band for a tight fit to adjust the clamp diameter, however this is an easy task should it be required.

J40569 **£50.50**

Ivory Gauge Holders (Motormeter Style)

Good quality reproduction of the Motormeter gauge holder as offered in the 50s and 60s. Simply clamps onto your steering column, meaning that it will fit just about any vehicle with a clear column so no need to cut your pristine dash board to fit an accessory gauge.

Finished in ivory this holder will take any standard 52mm gauge.

J40567 **£45.25**

ELECTRICAL

ACCESSORIES

Chrome Gauge Holders (Motormeter Style)

A classic reproduction of the Motormeter gauge holder as offered in the 50s and 60s. This simply clamps onto your steering column meaning that it will fit just about any vehicle with a clear column so no need to cut your pristine dash board to fit a accessory gauge. Finished in Chrome this holder will take any standard 52mm gauge. Please note for some models like splits/bays then smaller diameter steering columns means you may need to pad out the clamp or shorten the steel band for a tight fit to adjust the clamp diameter, however this is an easy task should it be required.

J40569 £50.50

Ivory Gauge Holders (Motormeter Style)

Good quality reproduction of the Motormeter gauge holder as offered in the 50s and 60s. Simply clamps onto your steering column, meaning that it will fit just about any vehicle with a clear column so no need to cut your pristine dash board to fit a accessory gauge. Finished in ivory this holder will take any standard 52mm gauge.

J40567 £45.25

Exhaust Valve 33mm VW T2 Bay 1700cc, 1800cc, 2000cc 1971-1979 VW T25 2000cc 1979-1983

33mm Exhaust valve. Suitable for 1700cc, 1800cc and 2000cc Type 4 Engine in VW T2 Bays from 1971 to 1979 and the 2000cc Aircooled VW T25s from 1979 to 1983.

J40107 022-109-612/D..... **£10.75**

39.3mm Inlet Valve 1700cc T2 Bay 1972-1975

High quality replacement inlet valve. 39.3mm. Fits 1700cc VW T2 Bays from 1972 to 1975.

J15183 021-109-601..... **£7.25**

Rocker Shaft Stud Beetle 1961-1998 T2 Split 1961-1967 T2 Bay 1967-1979 T25 Watercooled 1900cc-2100cc 1979-1992

Rocker shaft stud. M8 / M10. Sold individually. Fits VW Beetles from 1961 to 1998, VW T2 Split Screens from 1961 to 1967, and VW T2 Bays from 1967 to 1979.

Also fits 1900cc and 2100cc watercooled VW T25s from 1983 to 1992.

J60828 113-101-399/B..... **£4.70**

Rocker Shaft Thrust Washer VW Beetle 1961-1998 VW T2 Split 1961-1967 VW T2 Bay 1600cc 1967-1979 VW T25 Petrol 1979-1992

Good quality reproduction product. Flat washer for the rocker shaft. Sold individually. Sixteen of these per engine.

Fits VW Beetles from 1961 to 1998, VW T2 Split Screens from 1961 to 1967, 1600cc VW T2 Bay from 1967 to 1979 and Petrol VW T25 1979 to 1992.

J39974 025-109-435..... **£1.15**

Rocker Shaft Spring Clip VW Beetle 1961-1998 VW T2 Split 1961-1967 VW T2 Bay 1600cc 1967-1979

Good quality reproduction product. Sold individually. Rocker shaft spring clips. Fits VW Beetles 1961 to 1979, VW T2 Split Screens from 1961 to 1967 and 1600cc VW T2 Bays from 1967 to 1979.

J39975 025-109-439/A..... **£0.95**

Valve Spring All 1200 to 1600cc Aircooled 1960-1979

Sold individually. Fits all standard 1200 to 1600cc aircooled engines from 1960 to 1979.

Please Note: Will not fit Type 4 1700 to 1800 cc engines.

J21072 113-109-623/C..... **£5.00**

Valve Spring Retainer VW Beetle 1961-1998 VW T2 Split 1961-1967 VW T2 Bay 1600cc 1967-1979 VW T25 1600 1979-1983

Good quality reproduction product. Sold individually. Valve spring retainers. Fits VW Beetles from 1961 to 1998, VW T2 Split Screens from 1961 to 1967, 1600cc VW T2 Bays from 1967 to 1979 and 1600cc CT VW T25s from 1979 to 1983.

J39976 113-109-641/B..... **£2.50**

ENGINE CASKET SETS & SEALS

Camshaft End Cap All Aircooled Engines 1965–1998 Split Screen 1965 to 1967 Bay 1967 to 1979

Good quality replacement product. Fits all 1300cc to 1600cc air-cooled engines, and 1700cc to 2000cc Type 4 aircooled engines. These metal cam plugs are for use with engine cases with a grove cut into to allow fitting.

J16764 113-101-157/C **£2.75**

Needle Bearing Seal VW T2 Bay 1700cc, 1800cc, 2000cc 1971–1979 VW T25 2000cc Aircooled 1979–1983

Good quality reproduction product. Needle bearing seal. This is the felt seal between the needle bearing and fly wheel as used on VW T2 Bays with the 1700,1800 and 2000cc Type 4 engine and the VW T25 with the 2000cc aircooled engine built from 1979 to 1983

J40089 021-105-311 **£0.80**

FUEL SYSTEM & FILTERS

Fuel Pump VW T2 Bay 1700-2000cc VW T25 2000cc 1979-1984

Supplied with gasket this reproduction fuel pump fits all carburetor model T2s 1700 to 2000cc from 1972 to 1979 and the 2000cc aircooled T25 form 1979 to 1984. It is advised to change the push rod (J31081) at the same time as they do wear which can cause running problems and the flange (J29506) as they crack and can leak oil.

J20006 021-127-025/A **£64.25**

Injection Fuel Pump VW Beetle 1975–1979 VW T2 Bay 1975–1979 VW T25 1983–1992

Good quality reproduction product. Fuel pump for use with fuel injection engines in VW Beetles with AJ engine codes from 1975 to 1979, VW T2 Bays with GD, GE, and ED engine codes from 1975 to 1979, VW T25s with CV code 2000cc Aircooled engines from 1979 to 1983 and VW T25s with 1900cc and 2100cc injection engines from 1983 to 1992.

J41665 251-906-091 **£49.75**

5mm Fuel Hose (Per metre) and Clips VW Beetle, VW T2 Split and bay VW T25 1946 on

Take advantage of our money saving bundle kit consisting of 1 meter of fuel hose and 6 fuel hose clips. This product is a flexible, black hose suitable for leaded and unleaded petrol. Good ozone resistance and resistant to oil and other contaminants found in and under your van or Beetle. With a working temperature rated at -40°C to +135°C this hose is rated to SAE J30 R6, R7, R8, R11 This hose is compatible with E15 fuel and can be used with up to 20% Bio Fuel mix.

J39806 **£7.75**

GENERAL ENGINE PARTS

Stainless Steel Push Rod Tube 1700, 1800 & 2000cc VW T2 1971-1979 VW T25 1979-1983

Quality Preservation Parts product. Sold individually, eight required per engine. Fits all 1700cc to 2000cc VW T2 Bays from 1971 to 1979, and all 2000cc VW T25s from 1979 to 1983. Can be fitted in situ, without the need to remove the cylinder heads.

Don't forget to order your four small J10433 and four large J10436 seals at the same time and new push rod tube retaining springs J10696.

Retains the distributor drive on to the crank shaft on all aircooled engines built from 1947 onwards. Also fits 1900cc and 2100cc watercooled engines fitted to VW T25s from 1979 to 1992.

J39966 111-10-5-2/27 **£4.25**

IT'S BEEN A BUSY YEAR AT JUST KAMPERS.

Here's some of the things we were
doing in 2017.

**WHERE WILL YOU GO IN YOUR
VW IN 2018?**

MILLE MIGLIA

Earlier this year, the JK Team took part in the 90th Mille Miglia, a gruelling 1,000mile classic car rally around Italy. The vehicle they raced in was Jack the Giant Slayer, JK's 1956 Oval Beetle that really lived up to it's name. JK started out as car 429, but finished in 223 place, well within the top 50%.

The Mille Miglia was also a fantastic opportunity for JK to test out their ever-expanding range of parts and accessories, as they needed to get Jack ready for the event. Many of these new products are now on the shelves at JK.

This summer Mark Reynolds, who set up JK back in 1989, took some time off for his 50th birthday to travel around Italy with his wife, Kerry. They took a relaxed route through the countryside, enjoying the weather in Mark's 1967 Beetle Cabriolet, built just two weeks before he was born!

"The Open Day"

weekend is legendary!

Join us for the weekend and enjoy an outdoor cinema, great food, music and good times in the beautiful Hampshire countryside. All proceeds go directly to Cancer Research UK.

8-10TH JUNE 2018

Look for event details on our facebook page

BEACH CLEAN

As Surfers Against Sewage 250 Club Members we are keen to support SAS in any way we can. Most recently we've been attending their Beach Clean series.

During the 2017 series 475 beach cleans took place, removing an amazing 55 tonnes of plastic from our beaches.

In October, 18 of the JK team headed down to Bracklesham Bay. Our most disturbing find: a bottle top from 1972. Plastic is a real problem for the environment and we're happy to support SAS in their work to tackle it.

For more info: www.sas.org.uk

THE JK WAREHOUSE

We've just added another 3,000 square feet to our existing warehouse space, allowing us to store the hundreds of new products that we'll be adding into our range over the next few months. This brings our total warehouse space to nearly 40,000 square feet!

When we first arrived at JK HQ in 1999 we occupied a tiny space and wondered how we'd ever fill our little corner. Now, the space we originally took on only just fits in our Dispatch Department! We send out over 100,000 orders each year, and our warehouse is now open from 7am to 7pm, seven days a week. We've come a long way since 1999, and continue to grow all the time!

K JK Conversions

We stock a range of products for campervans, motorhome, caravans, trailer conversions, horse boxes, catering vans and a whole host of other vehicles that will help you to quickly and affordably transform these into your ideal home-away-from-home.

This is a new venture for us, which focusses on combining our 28 years of experience in sourcing and creating top quality products, with a sales and aftercare service that has earned us high praise on both Trust Pilot and Google Reviews.

EBI SHOW

We sent Gemma from the JK Purchasing Team, and Duncan from the Export Department over to European Bug-In in the summer, for their first ever show across the Channel! They went in Jack the Giant Slayer, and the pair had an amazing time at the show (despite the weather). It's always one of our favourite events!

★ NEW PARTS ADDED ★

We've added **over 1,000 new parts & accessories** to our range here at JK, and have had to expand our warehouse yet again to fit them in. This is becoming something of a yearly tradition here at JK HQ as we need more and more space to hold our stock!

HESSISCH OLDENDORF

After JK made such a place at the Mille Miglia, they were invited to bring the Beetle 'Jack the Giant Slayer' to the famous *Hessisch Oldendorf* show in Germany. The show was a lot of fun, and we're already looking forward to the next one in four year's time.

PRESERVATION PARTS

Over 470 parts in the range

We've scoured the globe to bring together the very best parts and accessories to create our **exclusive** Preservation Parts range. These are a showcase of the highest quality parts available anywhere in the world.

To become a Preservation Parts product, it must:

- Be as good as the original part
- Be manufactured by a reputable company
- Fit an Aircooled VW
- Be great value for money
- Pass our stringent quality control

**A 1977 WESTFALIA
CAMPER IN 2018**

ALWAYS CARRY A SPARE

Don't run the risk of a flat battery when out and about, do this simple modification and camp happily ever after

If you use your Van for family holidays, weekends away or just for days out at the beach, chances are you are going to want to use some form of electrical appliance. A simple solution is to fit a leisure battery and wire it into your Van's charging system using a split-charge relay. Fitting a second battery allows you to power a cool box / fridge or charge a laptop or 'phone whilst driving or parked up, without running the risk of draining your main vehicle battery.

At present, JK offers a couple of

simple, easy-to-install split charging systems suitable for Splits and Bays, along with T4, T5 and T6 models.

"POWER A FRIDGE OR CHARGE A LAPTOP OR 'PHONE WHILST DRIVING OR PARKED UP"

To illustrate how straightforward the procedure is, we installed one in an Early Bay. You will require a 13mm spanner, a screwdriver, cordless drill, cutters, wire strippers, crimp tool, three suitable self-tapping screws and cable ties. You will also require a battery clamp and a leisure battery.

As always, before commencing work, remove the earth (marked negative) lead from your main vehicle battery. ⚡

The design of the Bay Window makes it ideal for a leisure battery install as there is a spare tray on the left hand side of the engine bay. From this, lay the wiring loom across the back of the Bus, routing from left to right

1

A good place to locate the relay is on the left hand d-post inner structure. Hold it in position and mark the top locating hole

2

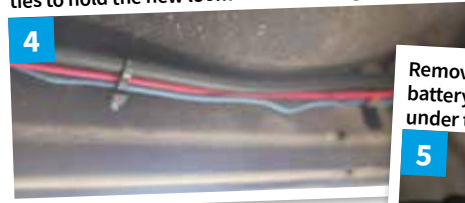

Drill this and mount the relay using a suitable self-tapping screw

3

The wiring loom for the rear lights runs along the top of the inner engine lid hinge panel, held in place with metal tabs. Carefully prise these open and locate the new section of loom within. Alternatively, use cable ties to hold the new loom to the existing wiring

4

Remove the positive lead from the main battery and secure the new power lead under the battery clamp nut

5

There are just two wires on the split charge relay. The brown wire goes to earth (we utilised the existing tail light earth for this) and the red (positive) wire needs to go to a switched live. For this, we routed the cable under the engine bay tar board and piggy backed it to the switched live terminal on the ignition coil

6

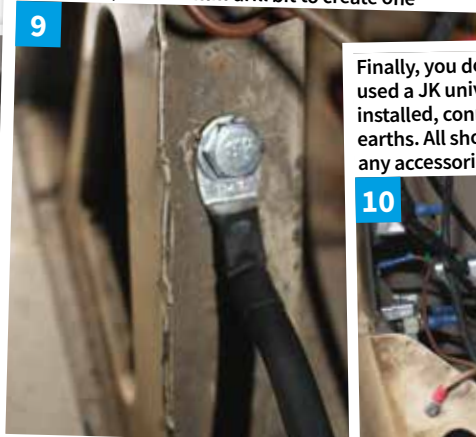

With the leisure battery in place, install the auxiliary fuse box loom under the battery clamp nut

7

Next, install the leisure battery earth lead. This must be bolted to a good earth point. On our Early Bay, we found an existing, factory-drilled hole on the inner d-post support and elected to use that. If no such hole exists, use an 8mm drill bit to create one

9

Then locate the fuse box on the rear inner wheel tub

8

Finally, you don't want your new battery sliding around, so we used a JK universal battery clamp to secure ours in place. Once installed, connect the positive leads on both batteries, then the earths. All should now be up and running, just leaving you to wire any accessories forward from the new fuse box

10

SPLIT CHARGING YOUR CAMPER

There's nothing more frustrating than turning the ignition key at the end of a relaxing day out, or holiday, only to hear that stomach-churning click that signals a flat battery, followed by at least an hour's wait for your chosen recovery service to arrive. Not to mention the embarrassment.

Fitting a leisure battery and split-charge relay means you'll never have that 'will it / won't it?' moment again and can enjoy your time away in your Camper without worry.

In an attempt to make this essential upgrade as simple as possible, we've put together a range of easy-to-install kits with pre-made wiring looms, relays and fuse boxes connected. All you need to add is your choice of battery and a battery clamp.

Split and Bay Window Kit

J41600 £75

This split-charge kit is designed to charge your leisure battery when the engine is running. The kit comes pre-wired and ready to install, with battery terminals, heavy duty earth strap, 100A relay and a six-way fuse box.

T4 and T5 power management voltage sensing wiring kit

J41604 £185

This comprehensive wiring kit comes with a pre-wired, 140A, voltage-sensing split charge relay and the necessary wiring to mount an additional battery by the offside rear wheelarch, with a compressor fridge behind the driver's seat. Included is wiring to connect a water pump with in-line switched tap, a 12V TV, a light switch next to the nearside door and six individual LED roof lights, as well as the power management board to ensure it all works safely.

T4 and T5 ignition-triggered kit

J41603 £85

This split-charge kit is supplied with a 1.5m, 16mm, 110A power cable and six-way fuse box so you can mount a leisure battery in the space under the driver's seat. The split-charge system is triggered by the ignition, so only allows the leisure battery to be charged when the engine is running.

T4 and T5 voltage-sensing kit

J41602 £120

This split-charge kit comes complete with a 1.5m, 16mm, 110A power cable and six-way fuse box, and is designed to mount a leisure battery under the driver's seat. The voltage-sensing, solid-state relay only allows current to flow between both batteries when one is charging above 13.7V, and will automatically disconnect both batteries when the voltage drops below 12.8V.

85Ah leisure battery

J16858 £89.50

255mm (l) x 175mm (w) x 210mm (h), weight 18kg

We have chosen this battery as it fits in most common VW applications, though please note it will not fit under the passenger seat of a Type 25.

85 Amp hours means this battery can deliver one amp per hour for a total of 85 hours before being fully discharged.

Comes with a one year manufacturer's warranty.

110Ah leisure battery

J16859 £115.25

337mm (l) x 173mm (w) x 225mm (h), weight: 27kg

For those that need a bit more juice on tap, this larger battery offers 110 amp hours operation but requires a little more thought as to where to site it as it will not fit under the passenger seat of a Type 25 or in the engine bay of a Split / Bay Window. Again, comes with a one year manufacturer's warranty.

Universal battery clamp

J41572 £7.10

Important to use when fitting a leisure battery to stop it sliding around and causing damage or an electrical failure.

WE ALSO SELL ALL COMPONENTS TO BUILD YOUR OWN BESPOKE SPLIT-CHARGE SET UP. PLEASE SEE THE WEBSITE FOR THE FULL RANGE

Fly drive USA

Driving your own Bus across the USA is the dream road trip for many, but just how easy it is to do?

Words and pics: Michael and Angela Leather

We all dream of taking time off and travelling the world, but the reality is it's a hard thing to do. Life has a habit of getting in the way and other things take priority. But, if you really want to do it, you can, you just need to plan well in advance and make sure you have all the necessary paperwork in place.

As North America is one of the most popular, and accessible, destinations for a major road trip, here Michael and Angela offer some first-hand advice and information on how to go about doing it.

We marked the places we wanted to visit and, from there, formed a rough route. We then looked at the distances involved, and how the weather changes with the seasons. For our trip, we estimated roughly six months, setting off in September from Halifax, in Nova Scotia, Canada, then travelling west across the USA and eventually ending up back in Canada again.

▲ Campfire in Warriors' Path State Park, Tennessee

▲ Morning brew essentials

Good advice

Things to consider when travelling with your own vehicle in the USA as a non-resident

VISA – Standard for the USA is 90 days. You cannot extend this by driving over the border for a few days to Mexico or Canada and re-entering the USA. If you want to stay longer, apply for an extended six-month visa.

Alternatively, start your trip in Canada, as your 90 days starts when you enter the USA. If you plan to travel to Mexico after the USA, be sure to hand in the immigration permit at the border.

CAR INSURANCE – This is tricky as many US car insurance companies require you to have a valid US driving licence. It is possible to gain insurance with a full UK driving licence but you will be classed as high risk and be given a low liability limit (the amount they will pay out in the event of a claim). You will also need a US address to register the car at.

Our best advice is to read up on travel websites before you go, and don't give up. Please don't, under any circumstances, drive around America without insurance.

This decision was partly based on our having family in Nova Scotia, but also as the cost to ship a vehicle to the west coast of America is significantly higher than the east. By shipping from Southampton to Halifax we saved approx £500 shipping and £200 on flights. Also, Canada has slightly less complicated legislation to import a vehicle temporarily into the country.

We found there is a sailing from most major ports on average every two weeks. Once you have confirmed a date and paid, you will be given a date to take your vehicle to the port. This can be up to two weeks before sailing. Take all your shipping and vehicle documents with you and ensure you are given a 'received' receipt. As part of your insurance policy, the shippers will take photos

▲ Rocky Mountains, Colorado

and write a condition report. Make sure this takes place. We also took pictures and did our own report for peace of mind.

Shortly after sailing you will receive a bill of landing from your chosen shipping company. You are required to be in the destination country when your vehicle arrives, and must supply an address and contact details of where you will be staying (a hotel is fine). This is important as the shipping agent needs to be able to contact you when your vehicle arrives. Bear in mind that ships and customs are frequently delayed, so it's worth building in a little contingency.

We used Kingscote Rojay Ltd. (www.KR-L.com) and were impressed with the service. For us, the whole

"I SPENT A LONG TIME GETTING TO KNOW OUR BUS HERE IN THE UK"

Pre-journey preparation

We were lucky in that the previous owner of our Bus, Rob Kerr, had maintained it very well. Nevertheless, before we left I did the following work:

- Renewed all brake shoes, flexi lines, handbrake cables and brake fluid
- Fitted a new rear offside hub, bearings and seals
- New front wheel bearings and seals
- New steering idler pin, drag link, steering damper
- Fitted a reconditioned steering box, coupler, master cylinder pin seal and pedal floor seals
- New cab rubber mats, sun visor, seat belts, windscreen wipers
- Replaced the clutch and release bearing
- Replaced gearbox oil and inspected CV joints
- Serviced engine, including checking timing and adjusting valves
- Tidied and renewed engine bay wiring, re-wired horn
- Added missing centre main heater pipe and attached heater cables
- Boxed in Propex heater and installed heat outlet and controller
- Put in copper gas lines from heater and hob to gas bottle storage area
- Soundproofed, insulated and cavity waxed everywhere
- Added Bluetooth amplifier so we could play music from our 'phones
- Stuck tape on our RHD headlight lenses to make them legal in the USA
- Finally, I installed elastic cargo nets everywhere!

process cost approximately £1,200, plus C\$200 for landing / admin costs and took two days longer than expected due to port delays and vehicle checks.

Before you are allowed to drive your vehicle away, you must pay the admin / release fee. You cannot do this at the port, it needs to be in place when you pick up your vehicle, so make sure it has cleared before you turn up. And have all the paperwork with you – shipping docs, proof of customs paid etc. and have it stamped.

◀ Fall (Autumn) in New York state

Cruising in the slow lane

So, with all this to consider, you may be wondering why we went through all the hassle and didn't just buy a Bus in North America. Good question, and we did consider it, even going so far as contacting a few specialists who offer to source vehicles for you, but for us it came down to budget, knowledge of our own Bus and the fact we didn't want to waste time travelling around trying to find an unknown Bus to buy.

If you have more time than we did, or plan to sell the Bus on again at the end of your trip, or perhaps don't have a Bus of your own and want to bring one back, it is definitely worth considering.

Our Bus is a left-hand drive 1969 Early Bay, rust free but a little rough round the edges. It already had many of the things we wanted when we bought it: leisure system; electrical hook-up; compressor fridge / freezer; Propex heater; new canvas; re-upholstered and comfortable ¾-width bed and a Westfalia Berlin interior from a later Bus. As we were going to be living in 'Rocky' for six months, I spent a long time getting to know our Bus here in the UK and preparing it to ensure it was in the best possible condition for our trip (see sidebar on p47).

One thing you won't be able to do before you arrive is sort your gas connection. Gas regulators in the USA and Canada are different to UK and Europe, so you will need to find an RV gas installation / conversion shop. We used HFC (www.hoseandfittingscanada.com) in Dartmouth, Nova Scotia, who also sold gas bottles small enough to fit in our Bus (most petrol stations only stock bigger sizes suitable for large RVs), then used U-Haul and Canadian Tire for refills.

You can't knock stock

Our advice would be not to take a mint restoration, or a heavily modified Bus, on a trip like this as there's a lot that can go wrong and you don't want to be worrying about your Bus all the time. If you plan to do a lot of wild camping, or heading off the beaten track, stock ride height and commercial tyres will be beneficial. Make sure you have plenty of storage, both practically and for security reasons, that your Bus is structurally sound, well maintained and recently serviced. You can't plan for every eventuality, but you can be prepared.

I would have liked a stock 1600 for ease of repair, but we bought our Bus already fitted with a 1641cc engine with an external oil filter, electric fuel pump, Pertronix electronic ignition and a mismatched carb. It had good compression, oil pressure and didn't leak, so we decided to stick with it, just replacing the carb with a pair of 34ICT Webers. I also added oil pressure and temp, cylinder head temp and voltage gauges, just to keep an eye on how everything is running.

In hindsight, a more powerful engine would have helped up some of the mountain passes, and disc brakes would definitely have helped coming back down them!

CONTAINER VS RORO

Container shipping is more secure, but more expensive than RORO (Roll On, Roll Off, where you simply drive to the port and your vehicle is driven on, and then driven off for you at the other end). It can also be subject to more checks at customs, which can ramp up admin fees.

RORO requires the vehicle to be empty, so no pots and pans, bedding, tools, nothing. But don't worry, in North America everything you'll need is readily available.

Inside, as well as the things previously mentioned, it had a 125A/h leisure battery with cut-off switch, VSR, battery charger, 3-pin and USB plugs and a 12V adapter. To make it USA-friendly, we just changed the battery charger for a 110V version as we only planned to charge camera and laptop batteries. We also added a 100W flexi solar panel, which is connected directly to the leisure battery via a solar controller, and wired the stock Westy interior lights into the leisure circuit, with LED bulbs to save a little power.

The most important thing to remember is, no matter how well you plan it, a trip like this will seldom be what you expect, for all the good reasons, as well as the not so good. We found we had to embrace something new every day, whether it was just a new place, a new face or a new mechanical issue! There's no doubt it can be tiring and trying living in such a small space, but falling asleep peering at the Milky Way, or waking up to breathtaking mountain peaks glowing red at sunrise, it's all worth it.

Travelling for months on end, we sometimes just wanted to stay put in one place for a while, especially when it was somewhere we really liked, or when it was time to service the Bus, so leave enough flexibility in your itinerary to allow for this. And be prepared to change your plans at the last minute based on the weather, people you meet and advice you will undoubtedly be given. In our experience, that leads to the best experiences of all. Good luck, and happy travelling. 🍷

▲ The Milky Way meets the desert of Utah

What to take

This is very personal, but we flew with some plates, cups and blankets we were particular about, then bought everything else when we arrived from the likes of Canadian Tire, Wal-Mart, Dollarama, Amazon and The Bus Depot (who we were pleased to find sell Just Kampers' parts).

We took a selection of tools and spares in our hold baggage, but be aware FAA law says you can't fly with anything that has any trace of oil, grease or fuel on it. Weight is also a consideration.

The used parts we did take, including spare rocker arms (you can't buy them individually) and specialist tools such as a flywheel lock and torque multiplier. I cleaned with a pressure washer then ran through the dishwasher!

For new spares, we were very grateful to be helped by Just Kampers, who provided a number of parts to take with us.

Any tools you might need can be bought easily in North America, though must be declared when entering Canada or the USA. We kept ours spotless and in clear plastic bags, with documents to show proof of purchase / shipping.

Crankcase splitter simply fits into the oil pump aperture and helps to split the crankcases.

J60055 121 **£13.50**

OIL SYSTEM & LUBRICANTS

Morris Golden Film 20W/50 Classic Motor Oil 5 Litre

Quality Morris product. Golden Film SAE 20W-50 Classic Oil. Recommended for use in veteran, classic and vintage cars, motorcycles, commercial vehicles and tractors, where engine design and tolerances prohibit the use of modern high additive level oils. Modern dispersant additives keep combustion chamber contamination suspended in the lubricant, allowing full flow cartridge filters to remove it. Early oil filtration, usually in the form of a mesh gauze or strainer, is not efficient enough to remove this suspended material. Golden Film SAE 20W-50 Classic Oil is a low dispersant oil and allows the suspended matter to drop harmlessly into the sump.

The multigrade properties of Golden Film SAE 20W-50 provide improved cold start circulation whilst maintaining good working oil pressure.

J39278 **£25.00**

Morris Golden Film Flushing Oil

Morris Flushing Oil is a combination of highly refined light mineral oils and detergent / dispersant additives to enhance removal of oil sludge.

Drain your old oil, put Morris Flushing Oil in, run your engine for 5 - 10 minutes, drain the flushing oil and put in your new engine oil. This process removes all traces of old oil, oil sludge and contaminating particles from your engine and can also help quieten noisy hydraulic tappets.

J42144 **£30.00**

Oil Filler to Generator Stand Gasket VW Beetle 1961 on VW T2 Split 1961-1967 VW T2 Bay 1600cc 1967-1979

This gasket is used between the oil filler and the Dynamo or Alternator stand on VW Beetles built from 1961 on VW T2 Splits 1961 to 1967 and VW T2 Bays with the 1600cc engine 1967 to 1979.

J37408 98-117-3-B **£1.50**

Oil Pressure Switch (0.15-0.45 Bar) Beetle 1961-1998 T2 Split 1961-1967 T2 Bay 1967-1979 T25 1979-1983

A Genuine Volkswagen oil pressure switch. Works between 0.15 and 0.45 Bar. Fits Beetles from 1961 to 1998, VW T2 Split Screens from 1961 to 1967, T2 Bays from 1967 to 1979 and VW T25s from 1979 to 1983.

If you have any questions about whether this is the correct switch for your vehicle, don't hesitate to get in touch.

J41950 021-919-081/B **£23.50**

Heavy Duty Oil Pressure Relief Valve and Spring Kit 1200cc, 1300cc, 1500cc, 1600cc 1970-1979

Quality EMPI product. Oil pressure relief valve kit. Suitable for all dual relief cases and features both springs and pistons. Fits VW Beetles from 1970 to 1998 and VW T2 Bays from 1979.

J40051 AC101020 **£5.25**

Oil Pressure Relief Spring VW T2 Bay 1700cc, 1800cc, 2000cc VW T25 1600cc, 2000cc Aircooled 1900cc, 2100cc Watercooled 1979-1992

Good quality reproduction product. Oil pressure relief valve. Suitable for use with 1700cc, 1800cc and 2000cc Type 4 engines in VW T2 Bays from 1971 to 1979.

Also fits 1600cc, 2000cc aircooled and 1900cc & 2100cc watercooled engines in VW T25s from 1979 to 1992.

GEARBOX OILS & TOOLS

Morris EP80/90 Gearbox Oil 5Ltr (API G L5) Gearbox & Diff Oil

Morris EP80/90 Gearbox Oil 5Ltr (API G L5) Gearbox & Diff Oil is a high performance, extreme pressure oil designed for use in gearboxes, drive axles and other transmission systems. It has extremely good cold start fluidity, ensuring fast circulation even when the oil is cold. Additionally, Lodexol has exceptional high temperature stability, ensuring maximum gear set protection and it protects against rust and corrosion.

Lodexol can be mixed with conventional mineral oils.

Morris Lubricants is a British family-owned company that's manufactured lubricants since 1869. It is now one of Europe's leading oil blenders and marketers, providing a range of quality automotive fluids for OEM, and the aftermarket, including specialist products for vintage cars and vans and motorsport applications.

SEAT BELTS & MOUNTINGS

Front Seat Belt Kit VW T2 Bay 1967-1979 VW T2 Split 1950-1979 (Non Walk Through Model)

Don't cut corners on safety. Older vans do not enjoy the same level of safety features as modern ones and safety belts are proven lifesavers. Replace old, worn or damaged belts now. These belts, made by Securon in the UK, fit all non walkthrough VW T2 Splits 1950 to 1967 and VW T2 Bays 1967 to 1979 and features a soft canvas stalk as opposed to the standard style wire stalk. The kit includes fixing bolts and brackets.

Please Note: We always recommend that seat belts are fitted by a qualified technician.

J39763 **£40.00**

Handy Hint!

Seat belt extender kits

Seat design and the thickness of seat foam varies, so we sell extender kits for lengthening the seatbelts. Just Kampers part no. J11679.

Seat belt mountings

If your camper started life as a panel van, the van will have no rear seat belt mounts. Just Kampers stocks seat belt mounting plates which can be welded to the vans floor and side panels. Just Kampers part no. J11582.

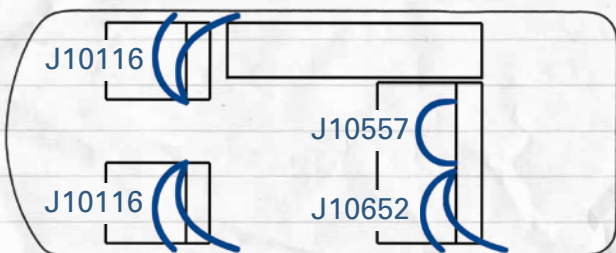

Seat foam must be fixed

When covering your rear seat foam, fix the seat cover SECURELY to the seat base, otherwise in an accident your passengers will slide under and probably hang themselves on your new seatbelts....Be warned!

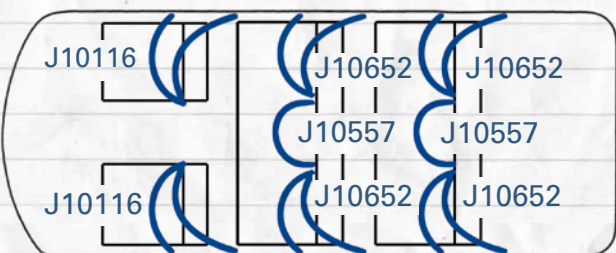

Handy Hint!

Seat belts & seat belt positions

Camping interior with 3/4 rock & roll bed

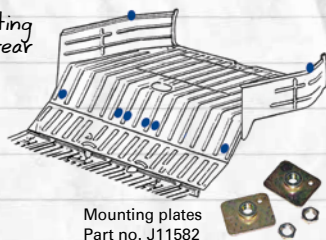

8 seater interior with 2 rear bench seats

Rear seat belt mounting points

Here are the rear seat belt mounting points for Type 2 and Type 25 rear engined Transporters.

If your van has no rear seat belt mounting points, these are the positions where the new mounting plates (JK Part No. J11582) must be PROFESSIONALLY welded.

Mounting plates

Only **£495.00**

Features and benefits

- Easy to install.
- Solid state electronic thermostat
- Quiet in operation.
- Choice of propane, butane or LPG power.
- Room sealed for safety.
- Minimal drain on battery.
- Reduces interior condensation
- Extremely low maintenance

Adjustable thermostat

Adjustable air vents

Kit includes

- Gas hose (2m length)
- Butane regulator.
- Gas bottle holder (7kg gas bottle)
- Magnetic gas level indicator.

Enjoy the luxury of central heating in your VW, whether you're parked up or on the move. The Propex Heatsource HS2000 is a highly efficient, compact, gas powered unit which runs independently of your vehicles heating system.

FREE with the JK Propex kit. Part No. J19842

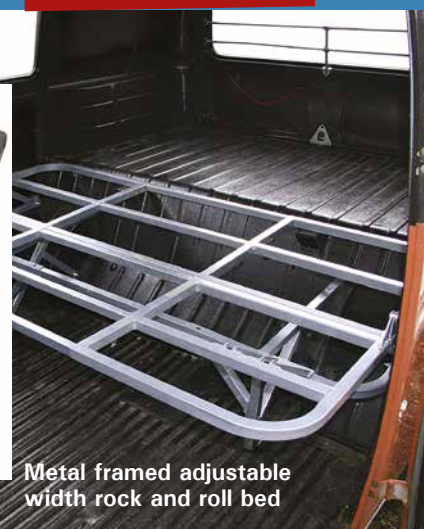

JK adjustable width rock and roll bed frame

Exclusive to JK

We are proud to include this product in the Just Kampers range.

The ingenious design of this frame allows you to adjust the width from a 3/4 to full width bed, which means that you can make the bed fit your interior rather than your interior fit the bed.

Manufactured in the UK this product is well made and adheres to all current safety standards. The powder coated framework comes flat packed with the required bolts and fittings applicable to your vehicle. You will need to source your own boards to complete the job. Due to the strength offered by the framework, you will only need 9mm ply or MDF thus offering a substantial weight saving.

Metal framed adjustable width rock and roll bed

Handy Hint!

Clutch cable conduit

When you replace a clutch cable, check the condition of the clutch conduit. It often breaks inside, leaving a sharp metal which will eventually cut your new cable.

Just Kampers stocks cables by GEMO which are manufactured to the highest quality.

GEMO

GEMO, a trusted German manufacturer of control cables, is a leading supplier of original equipment and spare parts to the automotive industry. Working to stringent VDA standards (the Association of German Automobile Manufacturers), it produces cables renowned for lasting longer than average.

Propex Heatsource bundle kit Part No. J19842

Speedo cable centre cap (or 'grease' cap)
J10615 211405691B...GENUINE..... **£6.00**

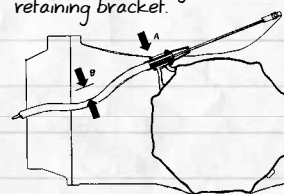

Handy Hint!

Adjusting the clutch pedal free-play

Clutch adjustment is carried out by means of the adjusting nut on the cable end. Release the locknut and turn the adjusting nut to give a pedal free-play of 10-25mm (0.4-1.0 in) which corresponds to the correct clearance of approx. 2 mm (0.08 in) on the clutch release bearing. Tighten the lock nut.

To avoid cable snatch, the clutch cable guide should sag 25-45mm (1.0-1.8 in) as seen in the diagram

below. The sag at point 'B' is achieved by inserting or removing shims at point 'A', between the end of the cable guide, and the retaining bracket.

Pedal Rubber Pad

Sold as singles fits either brake or clutch pedal.

J11805 211721173 £1.45

Handy Hint!

Remember to carry spare cables with you

Carry a spare accelerator and clutch cable with you. Due to the unusual length of the cables, Mr AA or RAC may not carry the right cables and it may not be possible to repair your broken one at the roadside.

Batteries

Batteries come with a 3 year manufacturers warranty.

Note: Due to the nature of this item delivery may take 2 to 3 working days. As there is acid content there must be a adult available to accept delivery. This item can not be left with a third party or left "safe"

J18549

Bundle Kit Price £85.50

Preservation Parts & Hella are now working together to provide VW owners the highest quality reconditioned units on the market

These products are exclusive to Just Kampers

Our Preservation Parts range has also increased to include electrical components. For far too long there has been a real issue with starter motors, generators and alternators. This has been down to the fact that you have not had the option to buy OE quality reconditioned units, leaving you with no choice but to buy poor quality replacements from China. These products are very cheap, but for a reason! Suppliers snapped them up, as they were so cheap. Many suppliers felt the differential in price between the low quality units and the real-deal from Hella was reason enough to stop ordering from them and without a need for their products, Hella ceased reconditioning starters, generators and alternators for air-cooleds. This would not have been a problem, if the cheap Chinese copies proved to be reliable...but they certainly weren't!

As we constantly monitor the forums, speak to VW owners on a daily basis, and are VW enthusiasts ourselves, we are aware of issues with products. The amount of negative stories on the subject was such that we knew we had to do something about it. We met with Hella and found that due to a lack of orders they had not been getting any units to recondition – known in the trade as 'core'. They were happy to start reconditioning units for us, but we had to supply the core units. So, we started a quest to locate hundreds of generators, alternators and the various different styles of starter motors fitted to VWs over the years. These were then delivered to Hella and reconditioned. We can now offer a range of OE quality, guaranteed exchange units for your VW at prices you will find very appealing. These Hella Preservation Parts units are only available through Just Kampers.

-  **5 Dynamo or Alternator Strap 1600cc 1967 to 1979**

Wiper Blades, Motors & Switches

New washer bottle with built-in electric pump. 1967-79

Treat yourself to a replacement 12v washer bottle kit with built-in electric pump. No longer will you have to manually repressurise the system - your washers will work at the press of a button, giving constant water pressure every time. No internal air pressure means no more annoying air leaks! And, it fits in the original position so it will fit in perfectly with your resto.

J12979 211945363A  £6.75

Handy Hint! My indicators flash too fast!

Switch the hazards on...If the relay now clicks at the correct rate, see if all four indicators are working. You will probably find one isn't. Check for a blown bulb. If the bulb is OK, check and clean the electrical connections, especially the earths. If the hazards still flash too fast and there are no blown bulbs or faulty wiring, you will need to replace the relay.

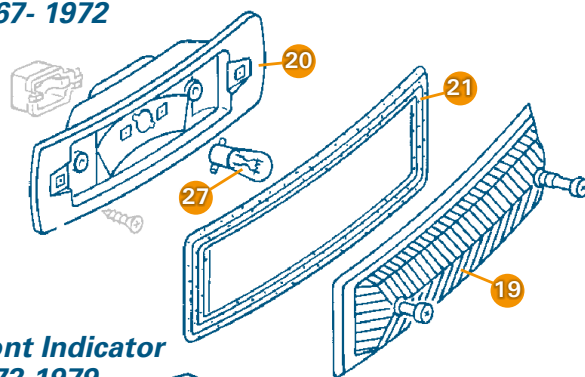

- 18 Reflector Base (Front Side) 1970 to 1979**

Handy Hint! Wheel fitting guide

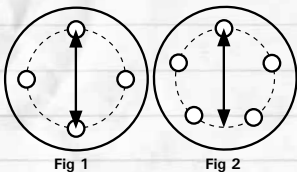

Fig 1

Fig 2

The bolt pattern describes the position & number of bolts on a wheel.

The PCD 'Pitch Circle Diameter' is the distance (in millimetres) between the center of two diametrically opposite bolts. In the 4-bolt wheel (Fig 1), this would be the distance between the top and bottom holes. Some basic geometry is needed to find the center of the 5-bolt pattern

(Fig 2): But the simplest way is to multiply the center distance between any two adjacent holes by 1.701 (for example bolt holes 3 and 4 in (Fig 3)).

It's possible for 4 and 5 bolt wheels to share the same PCD, so if the wheels in (Fig 1) and (Fig 2) both had a PCD of 130mm the 4 bolt wheel on the left would be described as having a PCD of 4/130 and the wheel on the right would be a 5/130.

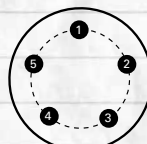

Fig 3

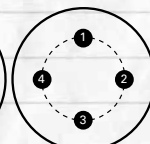

Fig 4

-  **Whitewall Trims Set for Standard 14in Wheels**
Sold in sets of four.
J12029 ... **£58.95**

Handy Hint! Jacking up your Volkswagen

If you use the standard VW jack and jacking points, always check the condition of jacking points and surrounding metalwork.

If you are using a bottle, scissor or trolley jack, they must be placed under the front axle beam or under the rear torsion bar crossmember (ahead of the gearbox).

Always check the wheels to prevent the vehicle rolling and if you are going to be under the vehicle, ALWAYS USE AXLE

STANDS. Wherever possible, always jack your vehicle on a level solid surface, never on gravel or grass. You may not have a choice in the case of a break down, so carry a flat (strong) piece of wood or similar to put under the jack if you have to change a wheel on the 'not so hard' shoulder.

VDO Gauges

VDO Automotive has a long history of producing electrical components for VW and is one of the biggest names in the supply of Original Equipment to car makers worldwide. They supply VW with many of their gauges and electrical parts and have an excellent reputation in aftermarket parts.
