Wind break set-up

Step by step instructions

A few pointers to help you erect your windbreak for the first time. This may require two people on a windy day.

First lay the windbreak out flat on the ground.

Insert all four up-right poles through the sleeves, with the point at the top of the windbreak (1).

Starting from one end place the top support bars through the sleeve fitting the hole in the end of the bars over the locating pins (point).

Now you can stand the windbreak up-right making sure the windbreak is curved away from the wind.

Fit the feet (2) on the bottom of the poles and peg them down.

Also peg down the pre-fastened guide ropes.

1. Insert up-right poles with point at top of windbreak

2. Fit the feet and peg them down

3. Peg down the guide ropes
