DANBURY VOLKSWAGEN

The Car with the built in Caravan:-

Travel in complete comfort, cook, drive, wash up easily, and set out whatever sleeping accommodation you wish, quickly and simply.

TRAVELLING: The two forward lockers slide back and lock in a forward-facing position (no travel sickness), and all the cushions are deep foam.

COOKING: The Danbury high-pressure cooker (standard on all models) is functional, super-efficient and swings down into the front locker when not in use . . . thus creating another seat for that extra traveller.

DINING: You can easily transform the separate front seats into a bench, giving comfortable seats for the whole family.

CLEARING AWAY: After meals the washing-up is easily done in the Danbury full-size sink, which of course has a pumped water supply.

BED-TIME: For the adults, double or twin beds in a matter of moments. A child sleeps across the beautifully insulated engine deck (useful point . . . much less noise when travelling). A further child's stretcher bunk can be easily fitted across the cab (optional extra).

ELEVATING ROOF: A further 2 full sized roof bunks can be provided when the Danbury fully lined and ventilated elevating roof is fitted. This is easily raised for sleeping - and just as easily secured in the storage position for travelling - and of course gives extra head room.
